

5th and 6th Grade Notes

December 20, 2019

We've made it to Christmas break! Even though we wipe down our desks, doorknobs, and light switches daily, we've had several students out for several days. Whatever germ is floating around is a doozy. Hopefully everyone can stay healthy over break.

What we've done this week...

Those that have been in school have been finishing their persuasive essay. Completed essays are hanging in the hallway. Sixth grade math began a statistics activity involving M&Ms. We will work to finish the statistical analysis once we return from break. Fifth grade math is working with multiplying decimals. It wouldn't hurt to review multiplication facts. I plan to incorporate timed math facts tests in January. Also, I have linked several websites to assist in learning state locations and capitals in Google Classroom.

I tried to plan for no homework over break, but if your child has been absent, I'd love if they could get their persuasive paper completed. If they have access to a computer, your child can work in their saintscjm account and share their Google Doc with me. I can make comments and suggestions, so they could complete it and have it off their plate before Christmas.

Many prayers for a great Christmas and blessed New Year! See you in 2020!
