

5th/6th Grade Science

March 5th, 2020

Hello Families,

This week we began chapter 3, Erosion and Deposition, in our Earth's Surface books. We covered lessons on mass movement, water erosion, and glacial erosion. Next week we will cover wind and wave erosion. I am planning on a test over this chapter Monday, March 16th.

The students have been focused this week and have had great attitudes. Way to go 5th and 6th graders! Keep up the good work.

I pray you all have a great long weekend. Feel free to contact me with questions or concerns.

Blessings-

Mrs. Gilbertson
