

Fifth & Sixth Grade Notes

(and 7/8 Grade Math Notes, too)

October 15, 2021

Dear Families,

School staff will be participating in professional development on Friday, October 22, so there will be no school that day.

Mrs. Gilbertson and I will be staying after school on Wednesday, October 20, to help any grade 5/6 - 7/8 student with homework. This time is to be spent asking questions, clarifying understanding, and working quietly and responsibly without disturbing others seeking assistance. Parent pick-up will be at the upper lot doors by the playground at 3pm.

In social studies, we took a quiz on culture and globalization. We begin Ancient History next week with the Stone Age.

We will begin research for our informational paper. Vocab, spelling, and AV words are found on the back. There will be a quiz on these words next Thursday, due to no school on Friday.

We began Unit 2 on sacraments. Students are patiently waiting for our next altar serving training.

Math 5 continues dividing by 2 digit divisors.

Math 6 is reviewing operations with fractions and will test next week.

Math 7 has just about finished their module on percents and will probably be testing by the end of the week.

Math 8 reviewed solving equations and will move forward with book work next week.

Algebra continues solving and graphing inequalities.

Peace,

Mrs. Sullivan
