

# Fifth & Sixth Grade Notes

(and 7/8 Grade Math Notes, too)

October 21, 2021

Dear Families,

Our Halloween party will be Thursday afternoon. Students can wear black and orange that day. I am grateful to our room parents for organizing this for us.

In social studies, we began our unit on the Stone Age. We will continue that next week.

We began research for our saint paper and continue our lessons on the Sacraments.

The theology research paper will serve as our informational writing project. Vocab, spelling, and AV words are found on the back. There will be a quiz on these words next Friday.

We will have altar serving practice on Monday. Students will begin serving during the weekday Masses on Wednesday.

Math 5 continues dividing by 2 digit divisors.

Math 6 tested on fraction division. Our next module explores decimals.

Math 7 tested on percents. We begin integer operations next.

Math 8 is solving equations with one, infinitely many, or no solutions.

Algebra continues solving and graphing inequalities.

Special recognition goes to *Grahm Gibbs*, in Grade 7/8 for completing sudoku puzzles as quick as lightning. He turns in one just about every day! *Saylor Ferguson* is close behind him. We have several more throughout Grades 5-8 that are catching the bug to complete the puzzles, as well.

Peace,

Mrs. Sullivan
