

Fifth & Sixth Grade Notes

(and 7/8 Grade Math Notes, too)

October 29, 2021

Dear Families,

Our class was truly spoiled with treats yesterday! We had a lot of fun painting our wood block pumpkins.

The first marking period has now ended. Going forward, the expectation is that everyone by this age, grade, and experience knows the importance of putting names on work. No name papers will be recycled.

In social studies, we are finishing up our Stone Age section. Expect a test next week.

Our saint papers will be due Monday. We continue learning about the Sacraments. Our class has done a great job stepping up and participating as altar servers and choir members for our weekday liturgies.

We will begin our new class novel next week. Vocab, spelling, and AV words are found on the back. There will be a quiz on these words next Friday.

Math 5 will test next week and move on writing expressions.

Math 6 spent some time on adding, subtracting, and multiplying decimals. Division is up next.

Math 7 will continue working with integers.

Math 8 is solving equations with one, infinitely many, or no solutions.

Algebra will be testing on chapter 6 next week.

Special thanks to the class for participating in Mass today in their own way. We had cantors, choir members, and a reader. Great job!

Peace,

Mrs. Sullivan
