Mrs. Kemp's 2nd Grade

October 11-15, 2021

OUR LEARNING

Thank you for attending parent-teacher conferences. Great things happen when schools and families work together! As always, please contact me at any point with questions or concerns.

Our class is working hard on not talking over me or each other, especially when directions are being given. We've talked about how waiting is hard work, but it makes our classroom run much more smoothly when everyone can hear. Please check in with your student about what improvements he or she thinks they can make.

Math & Social Studies

In math we will study different kinds of graphs, as well as learn how to gather and record data. Please continue to practice math facts each night.

In social studies we will learn about the types of groups we belong to and then read about different kinds of communities.

Religion & Reading

In reading we will focus on informational text skills while using our SUPER! magazine. In writing we will learn how to write an opinion paragraph.

In religion we will learn about the gift of free will, and study the Great Commandment. Be on the lookout for First Reconciliation practice materials in your student's folder soon.
