

Fifth & Sixth Grade Notes

(and 7/8 Grade Math Notes, too)

April 8, 2022

Dear Families,

Welcome back! Monday is our jean day. Next Friday is Good Friday, so there is no school. April 18 is also a day off for Easter Monday.

Please return the DTE energy forms because our class can receive a grant if we have enough returned. Also, any 5th graders that will be participating in 6th grade band or orchestra next year need to have the form returned as soon as possible. I have extras for those that may have misplaced it over spring break.

We began a new novel this week. *A Long Walk to Water* is based on a true story about the plight of clean drinking water in Sudan. Recently, our own middle school Interact Club had a jean day to support new wells in Sudan. We will have a vocabulary quiz on Friday, April 22.

In theology, we finished our unit on Confirmation. We will review and test next week. We will also talk about Holy Week.

We continue to take notes and learn about Ancient Rome.

Math 5 is busy multiplying fractions.

Math 6 is exploring orders of operations.

Math 7A has tested on Module 7. We move on to inequalities next.

Math 7B is working with circumference and area.

Math 8 will be testing on systems of equations next week.

Algebra is working with quadratic expressions.

Peace,

Mrs. Sullivan
